

TrHCREAM

TrHCREAM is a specialised product for the local relief of mild and occasional pain and inflammation caused by joint infiltration such as swelling, injury or other joint problems.

DIOSMIN

Diosmin, the main active compound of the product, is a flavonoid with excellent phlebotonic properties, increasing the resistance of the capillaries, reducing their permeability and preventing their rupture.

For this reason and because of its anti-inflammatory and anti-oedematous properties, as well as its antioxidant properties, it is very useful in the event of post-intervention or any joint ailment due to its soothing effect.

PRODUCT ATTRIBUTES

- Anti-inflammatory and soothing cream.
- Skin enriched with anti-inflammatory, soothing and vasoconstrictive active ingredients of natural origin.
- Vegan DDS Diosmin has a soothing effect from the first seconds of application and a progressive improvement over time thanks to the active ingredient Vegan DDS Diosmin (efficacy tested in vivo).
- Lecigel produces a decrease in temperature by 1.5 degrees, with a consequent cooling action over the following 20 minutes (Efficacy proven in vivo).
- Arnica is a natural analgesic and anti-inflammatory, which acts on muscle, bone and joint trauma.
- Dermatologically tested.
